First Reviewer

1. Your article has fulfilled the criteria and by this it is eligible to be published in this journal. Yet, there are still shortcomings that need to be improved in order to boost its quality.
2. I have read the section of "Literature Review" in your article and the evidences show that you must sharpen the parts related to the focus of your writing. Therefore, there is novelty in your article.
3. In the "Discussion" section, you must relate the topics discussed with the references available in the "Literature Review" section.
