

## CHAPTER V CONCLUSION AND SUGGESTION

This chapter provides the conclusion based on findings and discussion in the previous research. Suggestion also written here for the readers who are interested in translation field.

### A. Conclusion

Based on the result of the research could be concluded that there are 2 kinds of translation method used by *iTranslate* and *Sederet.com*. They are word for word and literal translation method. On *iTranslate* there are 6 sentences translated by word for word translation, they are in sentence 4, 26, 29, 32, 33, and 36. There are 45 sentences translated by using literal translation they are except sentence 4, 26, 29, 32, 33, and 36. On *Sederet.com* there are 6 sentences translated by word for word translation method, they are sentence 26, 29, 31, 33, 36, and 45. There are 45 sentence translated by using literal translation, they are unless sentence 26, 29, 31, 33, 36, and 45. While translation quality on *iTranslate* and *Sederet.com* in translating this article is relatively bad in three aspects of quality assessment, they are accuracy, acceptability, and readability (Nababan : 2012). Translation quality of *iTranslate* calculating all the points for all the sentence is : 1) Accuracy : (a) very accurate is 24 sentences, (b) less accurate is 17 sentences, (c) not accurate is 10 sentences. 2) Acceptability : (a) acceptable is 15 sentence, (b) less acceptable is 21 sentences, (c) not acceptable is 15 sentence. 3) Readability (a) high readability is 22 sentences, (b) less readability is 24 sentences, (c) low readability is 5 sentences. Translation quality of *Sederet.com* calculating all the points for all the sentence is : 1) Accuracy : (a) very accurate is 1 sentence (b) less accurate is 20 sentences, (c) not accurate is 30 sentences. 2) Acceptability : (a) acceptable is 0 sentence, (b) less acceptable is 20 sentences, (c) not acceptable is 31 sentences. 3)

Readability : (a) high readability is 1 sentence, (b) less readability is 17 sentences (c) not readability is 33 sentences.

## **B. Suggestion**

Based on findings in this research, there are some important points. For everyone especially the translator, it is important to consider the translation method that will be used because it has an influence on the translation product and its quality. For the next researcher, it is recommended to do extended research about translation quality assessment by using Indonesian to English text to help in understanding the translation field. For students, it is recommended to improve translation skills so that they do not need to use machine translation in every translating file because there is no perfect result from that machine. It is better to use tools like Cat, SDL Trados, Wordfast, MemoQ, etc. as a tool to translate files if it is needed. .
