

ABSTRACT

Muzaky achmad khatami (2022): "(effectiveness of environmental badge as a work program of the environmental service of Bandung regency)."

Effectiveness is a condition that shows the degree of progress or accomplishment of an objective as estimated by quality, amount, and time, as recently arranged. One type of substantial counteraction endeavors completed by the Bandung locale government is as the "Natural Badge". The approach depends on Law Number 32 of 2009 concerning Environmental Protection and Management (PPLH).

The motivation behind this study is to learn about the execution of the viability of the natural identification as a work program for the ecological help of Bandung locale, to figure out what impediments or snags are looked by town authorities in understanding the natural badega program in Bandung region, and to figure out the thing endeavors are being made by the public authority. Bandung Regency connected with the Badega Lingkungan program which was not completely understood.

The hypothesis utilized in this exploration is the assessment hypothesis as per Subagyo which comprises of two principal parts of the viability of a program, to be specific the Goals.

The exploration strategy utilized in this study is a subjective examination technique with a contextual analysis approach. The assortment methods utilized are perception, interviews, documentation studies, and general media materials. Then, at that point, the information examination strategy utilizes six procedures, to be specific handling and planning, perusing the whole information, investigating by coding the information, applying the coding system, introducing the information, and deciphering it. Witnesses in this study were chosen utilizing a deliberate examining method.

In light of the consequences of the specialist's examination, on the off chance that it is related with hypothesis (Subagyo, 2000) in regards to the elements of focusing on precision; Regarding the setting of the presence of Badega as a work program, the Bandung Regency Environmental Service can be lithe and responsive in doing all types of Badega's obligations. On the other hand, Badega must be able to be right on target in carrying out its duties as partners made by the Bandung Regency Environmental Service and be able to provide understanding and education to the public regarding the urgency of preserving the environment and reading every gap so that it can become economic potential. independent for the people of Bandung regency.
