Dear Dudang Gojali,

the manuscript Determinant Factors of Indonesian Muslim Behavior in Choosing Halal Products, submitted to Problems and Perspectives in Management Journal, needs to be revised.

Comments:

We are very grateful that you have chosen the journal "Problems and Perspectives in Management" among hundreds of others to publish the results of your research. Several our editors reviewed and discussed the article. We regret the editorial team concluded that it would be better for you to send it to another journal. Such a decision is based on the lack of confidence that the article will be interesting to our journal's audience and on the study of other equally important factors.

Although this decision is not positive for you and you may have been expecting something else, we thank you once again for the interest in our journal and look forward to further cooperation.

Our refusal gives you the right to send a manuscript to another journal (this will not be considered as a parallel representation of one manuscript in two different journals).

If you browse the journal of LLC "CPC "Business Perspectives" <https://businessperspectives.org/journals/>, it is possible can be the journal "Innovative Marketing" https://businessperspectives.org/journals/innovative-marketing?category_id=30 It is also indexed in various databases and is included in several citation systems, including Scopus since 2018. But again we emphasize the need for a thorough review of the key topics of the journal and the requirements for the registration and submission of the manuscript.

Remove figure 1. Write the Abstract according to the following algorithm: first two or three sentences indicate the relevance of the topic; the aim and object of the study; the methodology (methods) of the study (for theoretical studies – its theoretical basis) are described; the obtained results and their practical value are characterized. Dedicate most of the Abstract to the result. The volume of the Abstract is 150-250 words.

We wish you success.

The deadline for revisions is 2020-09-03

To revise a manuscript please don't forget to log in to the system and to upload a revised manuscript!

Kepada: dudang.gojali@uinsgd.ac.id

Dear Dudang Gojali,

the manuscript Determinant Factors of Indonesian Muslim Behavior in Choosing Halal Products, submitted to Innovative Marketing Journal, needs to be revised.

Comments:

The volume of the Abstract is 150-250 words. The abstract should be written as follows: relevance, purpose, method, results, conclusion. Most of the abstract should be devoted to the results and do it thoroughly, not just list: "Based on the test results obtained by Factor_1, with its constituent variable components 0.153 Personal So-cial Perceptionstd, 0.148 Halal Certificationstd, 0.111 Halal Awarenessstd, 0.125 Truststd, 0.151 Subjective Normsstd, 0.154 Satisfactionstd, 0.149 Attitudestd, 0.155 Religiositystd, 0.134 Inter-eststd."

It is necessary to remove from the abstract superfluous sentences which duplicate each other or do not bear important semantic loading.

Keywords should be specified. The author must be responsible and attentively in choosing keywords.

The purpose of keywords is to provide the insight to the reader into the contents of the paper. They should reflect the area of the research. The number of keywords should be 5-10 in average. There should not be the sentences, but the words or word groups. If the object of the study is not mentioned in the title of the paper (including the country, the region), it should be added to the list of keywords. There is no need to replicate words from the title of the manuscript.

It is necessary to specify JEL Classification codes (they should reflect the content of the article and be ambiguous).

If earlier the author was not aware of this classification system, he/she should attentively look through it in order to have a common understanding of all the areas defined in it http://www.aeaweb.org/jel/jel_class_system.php. The codes, indicated by the author should clearly reflect the research area. The author is welcome to use the codes from two or three areas, if they are covered in the research.

The Introduction is devoted exclusively to the relevance of the research topic and the formulation of the problem in general.

After the Literary Review:

- 1) the aim of the study should be formulated (clearly and specifically),
- 2) then point out the hypotheses (if you anticipate them
- 3) then give the methods.

The methods should be described specifically and clearly (including who was interviewed, how, how the results were processed).

Conclusions should be devoted to the demonstration of the idea of the article, to indicate the result and its novelty and, most importantly, what conclusions should be drawn from the result obtained.

Our journal strictly observes the principles of publication ethics, including when talking about citing the works of other scientists and the works they published earlier. Any loanwords, including text loans (even insignificant), are unacceptable without mentioning their author.

We kindly ask you to pay attention to the widespread problem of wrong citation when Author A somehow gives (mentions, retells) the text fragment from the work (published by Author B), which contains the reference to other work (published by Author C).

In this case there are two options of correct citation:

- 1 – cite the work of Author B and note that he/she, in turn, cited the work of Author C;
- 2 – directly mention the work of Author C as well and cite it.

Do not forget that you can also use direct citations, that is why please use the quotation marks and when citing the source please note the page from which this quotation was taken.

You should be absolutely sure that you did not violate the principles of publication ethics. If there are at least small doubts that there can be loanwords in your text, we kindly ask you to check the manuscript for plagiarism by yourself using the special instruments (plagiarism detection software).
